

Data Collection Protocol

This document outlines our standardized data collection methodology for audio datasets.

1. Speech Recording Guidelines

- Recording environment specifications
- Microphone placement and calibration
- Speaker diversity requirements
- Script development across languages

2. Environmental Audio Collection

- Location selection criteria
- Duration and sampling methodology
- Background noise control

3. Annotation Process

- Multi-tier annotation framework
- Quality assurance procedures
- Inter-annotator agreement metrics

4. Ethical Considerations

- Consent procedures for participants
- Privacy protection measures
- Data anonymization techniques
- Cultural sensitivity guidelines
